

SAIFULLAH JAMALI

FULL-STACK WEB DEVELOPER | AI INTEGRATIONS | AI TOOLS

hello@iamsaifullah.com | iamsaifullah.com | LinkedIn | +49 179 1668440

Germany | Open to remote opportunities

PROFESSIONAL SUMMARY

Full-stack web developer with 5+ years of remote experience building production SaaS, e-commerce, and AI-enabled web applications. Skilled in Vue, React, Tailwind CSS, Laravel, API development, and databases. Contributed to six products across marketing, video, lead generation, and digital commerce while collaborating with distributed teams.

CORE SKILLS

Frontend: React, Redux, Vue, Pinia, JavaScript, Tailwind CSS, HTML/CSS

AI & Product: AI integrations, workflow tools, SaaS, e-commerce

Backend: PHP, Laravel, REST APIs, databases

Collaboration: Git/GitHub, code reviews, mentoring, remote pair programming

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Jeeglo

2022 - Present

- Build Vue.js and Tailwind CSS interfaces and connect them to Laravel APIs and databases.
- Developed a landing-page builder using Vue and Laravel and integrated supporting libraries into production workflows.

Full-Stack Developer | Deevloopers

2021 - 2022

- Created front-end interfaces and connected them to PHP back ends and databases.
- Integrated third-party libraries and supported end-to-end feature delivery.

Mentor (Volunteer) | Microverse

Feb 2022 - Present

- Mentor junior developers through code reviews, debugging support, and guidance on clean code and remote collaboration.

PRODUCT CONTRIBUTIONS

Contributed to production web products used across marketing, video, lead generation, and digital commerce. Product links:

Grawt	Redeemlo	Unfold.video

PRODUCT ENGINEERING

Grawt

- Architected a custom Synapse-based agentic AI chat system supporting persistent multi-turn conversations, tool calling, and structured requirement gathering.
- Built AI-powered marketing tools, including an email writer, page builder, image generator, persona generator, and an MJML-based visual email builder.
- Created a framework-independent vanilla JavaScript widget builder, allowing users to publish and embed interactive widgets on external websites with a single script tag.
- Designed specialized AI-agent workflows that transform conversational requirements into complete landing pages, responsive marketing emails, and campaign plans, applying prompt engineering and asynchronous job queues to generate reliable, structured outputs.
- Developed campaign automation and lead-generation journeys connecting landing pages, forms, widgets, contacts, email sequences, delays, and custom-domain publishing.

Redeemlo

- Built a visual card designer using Fabric.js, enabling users to create branded digital and print-ready redemption cards.
- Developed bulk generation and lifecycle tracking of unique redemption codes for digital and offline marketing campaigns.
- Implemented campaign management, redemption tracking, and subscriber data capture to monitor code issuance and usage.
- Added custom-domain support with domain and SSL verification for branded campaign and redemption pages.

ListWeaver

- Developed an AI-assisted checklist generator for creating interactive lead magnets, onboarding systems, launch roadmaps, and reusable workflows.
- Built checklist progress tracking that allows creators to monitor contact engagement, completion status, and activity across their products.
- Created landing pages and supporting product pages for distributing checklists and capturing leads.
- Developed installable AI Skills that allow external AI agents to create and manage checklists, products, pages, content, and application workflows.
- Enabled contacts to access and interact with their assigned checklists through shareable AI-enabled links, reducing the need to navigate the full application.

ProductDyno

- Developed an embedded popup AI agent with multiple specialized skills that administrators can configure and train for different user-support and product workflows.

PERSONAL PRODUCTS

[Kanban Board](#)

A mobile-responsive project-management tool with multiple boards, drag-and-drop cards and lists, collapsible workflows, color customization, persistent state, and Google synchronization across desktop and mobile devices.

[KuickStore](#)

An affordable e-commerce platform for small businesses and social-media sellers, with product and category management, customizable storefront themes, order tracking, analytics, responsive storefronts, and operational tools.

[SiteSnap](#)

A responsive website-preview tool that renders any live URL across multiple device frames and captures the combined results in one screenshot, helping marketers and designers review pages without browser developer tools.

[Brand OS](#)

An AI-powered brand workspace where marketers, designers, and copywriters define a product's voice, audience, visual identity, and brand rules, then generate reusable, brand-aware AI Skills for content, images, videos, and landing pages.

EDUCATION

Bachelor's Degree

FUUAUST | 2019 - 2022

Remote Software Development Program

Microverse | 2022 | 1,300+ hours

CERTIFICATIONS

Microverse: HTML/CSS, JavaScript, React/Redux, Ruby/Databases, and Ruby on Rails certifications. Credentials are linked from iamsaifullah.com.
